

# SimLa Innovations

**Project:** The Power of PowerPoint

**Materials:** Access to a computer with Microsoft's ® PowerPoint.

**Cost:** \$0.00 (yay!)

**Time:** Depends

**Details:** If you can visualize any type of medical monitor, you can probably recreate it with PowerPoint. I have presented this topic at conferences and attendees are always amazed at what can be accomplished with a little PowerPoint knowledge. Here are a few examples:

- Vital signs bedside monitor (Image 'A')
- ECG/EKG telemetry monitor (Image 'B')
- Ventilator monitor (Image 'C')
- IV Meds Second Check (think Guard Rails)
- Bladder scanner
- Medication dispensing unit
- Defibrillator
- Fetal monitor
- Virtual patients
